

*MANSON CREEK
RESOURCES LTD.*

*2003
Annual Report*

President's Message

Manson Creek Resources Ltd. is looking forward to 2004 with optimism due to significantly improved market conditions across the metal sector which will help Manson advance its existing projects and allow it to acquire new advanced stage projects.

Manson's main activity in the recent months has been the generation of a new copper-gold project. Continued project evaluations are still ongoing to generate or acquire a relatively advanced stage project which can be brought forward with further low cost mapping and expansion drilling. Manson's treasury is in the position of allowing an acquisition and the first pass work that could bring a good project to the drill stage. Both Canadian and International projects are being considered.

Manson's land position in the Yukon remains in good standing. This includes the Tanner zinc sedex project, the Nad nickel, copper, gold project and the JRS polymetallic VMS and gold project. Developed at a grassroots stage during a time of very low commodity prices and poor markets, these projects are sufficiently advanced to potentially attract a partner. The Nad nickel project, although at a grassroots stage, is one of only a few new nickel exploration projects. The nickel price is currently at multi-year highs and is showing no signs of weakness for the foreseeable future.

On Tanner, a small program of mapping, prospecting and sampling work is planned for 2004 in areas of very high historical geochemical sampling results, many of which exceeded 10% zinc in first pass soil and stream sediment sampling and which remain unexplained. In order to fully consolidate the Tanner property, the Option to Purchase Agreement was exercised in 2003 resulting in Manson Creek's 100% ownership of the Tanner property. With increasing zinc prices, the right geological environment, and many elements indicating the presence of a large mineralized system, Tanner may be brought forward with the generation of new drill targets. For this exercise, Manson Creek will do its utmost to benefit from government programs in support of the mining industry in the Yukon.

Respectfully submitted on
behalf of the Board of Directors

James Devonshire
President

NAD Property

Manson Creek Resources Ltd. 100%

The Nad Property consists of 157 claims covering 3,282 hectares (8,107 acres). The claims were originally staked to cover ground prospective for high grade small silver-lead-zinc type deposits such as found on the Craig Property. Continued exploration has shifted the focus to other deposit types in the area.

Since 1998 and 1999, the discovery of sulphide bearing shales as well as large masses of sulphide bearing silica or listwaenites with anomalous values of copper (to 6.85%), gold (to 20.37 g/t), silver and zinc indicate new styles of mineralization other than those previously identified on Craig. An extensive volcanic complex has now been mapped on the NAD property and the new copper-gold mineralization is now recognized to occur at the volcano-sedimentary interface, a typical VMS type setting. Ongoing field work on the NAD Property in 2001 as well as airborne geophysical survey results, have resulted in outlining extensive nickel-bearing komatiitic flows, which are lithological units and nickel mineralization styles previously unrecorded in the area. Proterozoic komatiite districts have been the site of numerous discoveries and mining activity across the world including such areas as Raglan, the Thompson Belt (Manitoba) and the Kambalda district (Australia). Large areas of anomalous stream sediment sampling anomalous in nickel, copper and cobalt, combined with previously unrecognized propitious geology indicate potential for a nickel rich sulphide discovery in this area.

JRS Property

Manson Creek Resources Ltd. 100%

The JRS Property was staked in 2001 as part of a mapping and airborne geophysical surveying program which focused on a previously largely unexplored area with extremely high stream sediment geochemistry. At this time the Property consists of 25 claims within a context similar to that of the Marg VMS deposit located some 25 Km to the South West.

Drilling at JRS in 2002 intersected significant anomalous concentrations of gold, silver, copper and zinc mineralization associated with syngenetic disseminated to massive sulphides in a geological environment similar to that of the Marg deposit. Additional showings of gold-silver bearing quartz veins in shales were also found and documented on the Property. These occurred in areas of previously recognized mineralization as well as in drill core, some 2.4 kilometers from the known surface gold showings, indicating that the gold system may be much more widespread on the Property than previously anticipated. Gold and silver grades in veins were found to be as high as 4.27 g/t Gold and 10.6 g/t silver in grab samples in areas of relatively poor surface exposure. The gold bearing vein system, as well as the syngenetic polymetallic mineralization known to date remain open in all directions.

TANNER Property

Manson Creek Resources Ltd. 100%

The Tanner Property consists of 114 claims. The Property is considered prospective for the discovery of silver-lead-zinc rich sedex deposits similar to those found at Red Dog or Howard's Pass. Shallow core drilling in 2002 over an open 4 Km long airborne geophysical conductivity anomaly resulted in the discovery of important, locally mineralized synsedimentary breccias as well as bedded semi massive to massive sulphides. These occurrences contained anomalous concentrations of gold, silver, zinc and a suite of other elements typically enriched in sedex style environments. The second shallow drill hole stopped in a thick sequence of bedded barite, sequences which are commonly known to occur on top of mineralized massive sulphide lenses.

The 2002 drill program led to the staking of additional claims to cover an area of some 8 kilometers to the east of the drill area in an area with similar geology. These new claims cover previously unexplained, historical soil and stream geochemical values locally in excess of 10% zinc. This area of high geochemical values is scheduled to be further explored in 2004.

Auditors' Report

To the Shareholders of
Manson Creek Resources Ltd.

We have audited the balance sheets of Manson Creek Resources Ltd. as at September 30, 2003 and 2002 and the statements of operations and deficit and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the Company as at September 30, 2003 and 2002 and the results of its operations and cash flows for the years then ended in accordance with Canadian generally accepted accounting principles.

Manson Creek Resources Ltd.

Notes to the Financial Statements

September 30, 2003

1. Nature of operations

Manson Creek Resources Ltd. is engaged in the business of mineral exploration and development in Canada. Since inception, the efforts of the Company have been devoted to the acquisition, exploration and development of mineral properties. To date the Company has not received any revenue from mining operations and is considered to be in the development stage.

Mineral properties are recognized in these financial statements in accordance with the accounting policies outlined in Note 2. Accordingly, their carrying values represent costs incurred to date, net of recoveries, abandonments and write-downs, and do not necessarily reflect present or future values. The recoverability of these amounts is dependent upon the existence of economically recoverable mineral reserves; the acquisition and maintenance of appropriate permits, licenses and rights; the ability of the Company to obtain necessary financing to complete the development of the properties, where necessary, and upon future profitable production; or, alternatively, upon the Company's ability to recover its costs through a disposition of its interests.

2. Summary of significant accounting policies

a) Use of estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates that affect the reported amounts of assets, such as resource properties (see Note 1), liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

b) Cash and cash equivalents

Cash and cash equivalents includes bank and brokerage deposits and term deposits with maturities equal to or less than 90 days.

c) Mineral properties and equipment

Costs relating to the acquisition, exploration and development of mineral properties are capitalized on an area of interest basis. These expenditures will be charged against income, through unit of production depletion, when properties are developed to the stage of commercial production. If an area of interest is abandoned, or management determines that there is a permanent and significant decline in value, the related costs are charged to operations. The Company views the carrying values of mineral property interests on a quarterly basis by reference to the project economics, including the timing of the exploration and/or development work, the work programs and exploration results experienced by the Company and others, and the extent to which optionees have committed, or are expected to commit to, exploration on the property. When it becomes apparent that the carrying value of the property exceeds its estimated net recoverable amount based on the foregoing criteria, an impairment provision is made for the other than temporary decline in value.

Where the Company's exploration commitments for an area of interest are performed under option agreements with a third party, the proceeds of any option payments under such agreements are applied to the area of interest to the extent of costs incurred. The excess, if any, is credited to operations. Option payments made by the Company are recorded as mineral property costs. Options are exercisable entirely at the discretion of the optionee and accordingly, are recorded as mineral property costs or recoveries when the payments are made or received.

Equipment is recorded at cost net of depreciation calculated on a declining balance basis at rates ranging from 20% to 30%

Manson Creek Resources Ltd.

Notes to the Financial Statements

September 30, 2003

d) Flow-through common shares

Resource expenditure deductions for income tax purposes related to exploration and development activities funded by flow-through share arrangements are renounced to investors in accordance with income tax legislation. Future income tax liability is increased and capital stock is reduced by the estimated tax benefits transferred to shareholders.

e) Joint interest operations

Certain of the Company's exploration and development activities are conducted jointly with others. These financial statements reflect only the Company's proportionate interest in such activities. Although the Company holds some interests in mineral properties through joint venture agreements, none of its operations are carried on through joint venture entities.

f) Investments

Portfolio investments are carried at cost, less a provision for declines in value that are considered to be other than temporary.

g) Foreign currency translation

Foreign currency denominated monetary assets and liabilities are translated to Canadian dollars at the exchange rate in effect at the balance sheet date. Foreign currency denominated non-monetary assets and liabilities are translated to Canadian dollars at the exchange rate in effect on the transaction date. Revenue and expense items are translated at average exchange rates for the period. Foreign exchange gains or losses are included in the determination of net earnings for the period.

h) Financial instruments

The fair market values of cash and cash equivalents, accounts receivable, accounts payable and accrued liabilities approximate their carrying values as a result of the short-term nature of the instruments and/or the variable interest rate associated with the instrument. Unless otherwise noted, it is Management's opinion that the Company is not exposed to significant interest, currency, or credit risks arising from these financial instruments.

i) Reclamation costs

The Company's activities have primarily been focused on exploration directed toward the discovery of mineral resources. When it is determined that a future reclamation cost is likely, and the amount can be reasonably estimated, the costs thereof will be accrued.

j) Income taxes

Income taxes are recorded using the liability method of tax allocation. Future income taxes are calculated based on temporary timing differences arising from the difference between the tax basis of an asset or liability and its carrying value using tax rates anticipated to apply in the periods when the timing differences are expected to reverse. The effect on future tax assets and liabilities of a change in tax rates is recognized in income in the period that substantive enactment or enactment occurs. To the extent that the Company does not consider it more likely than not that a future tax asset will be recovered, it provides a valuation allowance against the excess.

k) Earnings (Loss) per share

Basic earnings (loss) per common share is computed by dividing the net earnings (loss) by the weighted average number of common shares outstanding for the year. Diluted per share amounts reflect the potential dilution that could occur if securities or other contracts to issue common shares were exercised or converted to common shares. For the years presented this calculation proved to be anti-dilutive. The treasury stock method is used to determine the dilutive effect of stock options and other dilutive instruments. Under the treasury stock method only "in-the-money" dilutive instruments impact the dilution calculations.

Manson Creek Resources Ltd.

Notes to the Financial Statements

September 30, 2003

l) Stock-Based Compensation

Effective October 1, 2002, in accordance with the recommendations of the Canadian Institute of Chartered Accountants, (CICA), the Company prospectively adopted, with no restatement or disclosure pertaining to awards granted prior to October 1, 2002, new rules for the accounting for, and disclosure of, stock-based compensation.

The recommendations of the CICA establish financial accounting and reporting standards for stock-based compensation plans as well as transactions in which an entity issues its equity instruments to acquire goods or services from non-employees. The Company has elected to follow the "fair value" method of accounting for stock-based compensation arrangements, whereby the fair value of the stock options at the date of grant is recorded as compensation cost. The fair value is determined using an option-pricing model that takes into account the exercise price and expected life of the option, the current price of the underlying stock, its expected volatility, the expected dividends on the stock, and the current risk-free interest rate for the expected life of the option. As no stock options were granted during the year ended September 30, 2003, no compensation expense has been recorded, nor has additional disclosure pertaining to the option pricing model assumptions been provided.

m) Government incentives

Through its exploration in the Yukon, the Company has benefited from refundable exploration tax credits and grants. These incentives are not repayable provided that they apply to qualifying expenditures. The incentives reduce the mineral property costs to which they pertain in the year that the qualifying expenditures are incurred or when eligibility becomes apparent, whichever is later.

3. Investments and other assets	<u>2003</u>	<u>2002</u>
Investments (market value \$20,000; 2002 – \$26,000)	\$ 22,412	\$ 26,000

Yukon

The Company has a 100% interest in claims in the Yukon properties of Tanner, NAD, JRS and Rusty/KLA. Pursuant to an acquisition agreement regarding the Tanner property, and subject to an extension, the Company made the final property payment of \$10,000 on November 10, 2003.

Impaired Mineral Properties

During the year ended September 30, 2003 management determined that exploration results from the Rusty/KLA property did not warrant further exploration and the property was written-off. Costs incurred to investigate a potential exploration property were also written-off.

5. Capital stock

a) Authorized:

- i) an unlimited number of voting shares
- ii) an unlimited number of Class A preferred shares issuable in series
- iii) an unlimited number of Class B preferred shares issuable in series

Manson Creek Resources Ltd.

Notes to the Financial Statements

September 30, 2003

b) Common shares issued:

	<u>Number of Shares</u>	<u>Stated Value</u>
Balance, September 30, 2001 and September 30, 2002	15,570,402	\$ 7,110,533
Escrow shares cancelled	<u>(200,000)</u>	<u>(91,334)</u>
Balance September 30, 2003	<u>15,370,402</u>	<u>\$ 7,019,199</u>

The Escrow shares were cancelled for no consideration. The average carrying value of the shares of \$91,334 reduced capital stock and increased contributed surplus.

c) Outstanding options

<u>Expiry Date</u>	<u>Number of Shares</u>		<u>Price</u>
	<u>2003</u>	<u>2002</u>	
May 29, 2007	455,000	455,000	\$ 0.11
July 19, 2006	<u>1,000,000</u>	<u>1,000,000</u>	\$ 0.10
	<u>1,455,000</u>	<u>1,455,000</u>	

The Company has an option plan, (the plan), under which up to 10% of the issued and outstanding common shares are reserved for issuance. Under the Plan, the options that have been granted expire at the earlier of five years from the grant date, the date at which the Directors determine, or 60 days from the date from which the optionee ceases to be a director, officer, employee or consultant. The exercise price of the options granted under the Plan will not be less than the market price of the common shares, defined as the weighted average of the trading price per share for the last five trading days before the grant date.

d) Option Transactions

	<u>Number of Options</u>	<u>Weighted-average Exercise Price</u>
As at September 30, 2001	1,175,000	\$ 0.13
Granted	455,000	\$ 0.11
Expired or cancelled	<u>(175,000)</u>	\$ 0.33
As at September 30, 2002 and September 30, 2003	<u>1,455,000</u>	\$ 0.10

6. Related party transactions

CDG Investments Inc., (CDG), a Company related by virtue of certain common officers and directors; officers of the Company, and corporations in which certain of the Company's officers and directors are shareholders, provided services, billing the amounts presented below for the respective fiscal years.

	<u>2003</u>	<u>2002</u>
Geological	\$ 28,000	\$ 72,000
Direct administrative	<u>58,000</u>	<u>56,000</u>
	<u>\$ 86,000</u>	<u>\$ 128,000</u>

Manson Creek Resources Ltd.

Notes to the Financial Statements

September 30, 2003

6. Related party transactions (continued)

Related party transactions were in the normal course of operations and were measured at the exchange amount which is the amount of consideration established and agreed to by the related parties. The related party payables are due to CDG with respect to administrative charges.

The Company sublet office space to companies related by virtue of certain common officers and directors. The aggregate base rent and operating costs charged to the Companies was \$63,000 during the year, (2002-\$83,000). The related party receivables pertain to rent receivables, all of which were received subsequent to year-end.

7. Income taxes

- a) Following is a reconciliation of income taxes calculated at statutory rates to the actual income taxes recorded in the accounts:

	<u>2003</u>	<u>2002</u>
Computed expected tax recovery at a combined Provincial and Federal rate of 38% (2002 – 39.8%)	\$ (167,000)	\$ (61,000)
Effect on income taxes resulting from:		
Non-recognition of losses and future tax benefits for financial statement purposes	<u>167,000</u>	<u>61,000</u>
Future income tax recovery	\$ -	\$ -

The net future income tax asset at September 30, 2003 is comprised of:

	<u>at 38%</u>
Income tax values in excess of book values of mineral properties and equipment	\$ 986,000
Investments with tax values exceeding book values	12,000
Non-capital losses carried forward	<u>138,000</u>
Future income tax asset before valuation allowance	1,136,000
Valuation allowance	<u>(1,136,000)</u>
Future income tax asset	\$ -

- b) The Company has incurred losses for income tax purposes of approximately \$363,000 the related future benefit of which has not been recognized in the financial statements. Unless sufficient taxable income is earned in future years these losses will expire in 2005, (\$6,000), 2006 (\$23,000), 2007 (\$55,000), 2008 (\$58,000), 2009 (\$109,000), and 2010 (\$112,000).
- c) The Company has the following approximate amounts available that may be deducted, at the annual rates indicated, in determining taxable income of future years.

	<u>Amount</u>	<u>Rate</u>
Canadian exploration expense	\$ 2,701,000	100%
Canadian development expense	352,000	30%
Foreign exploration and development expense	444,000	10%
Undepreciated capital cost	<u>56,000</u>	20-30%
	\$ <u>3,553,000</u>	

Manson Creek Resources Ltd.

Notes to the Financial Statements

September 30, 2003

8. Commitment

Effective January 1, 2002, the Company entered into a five-year contract to lease office space. Concurrent with entering into the lease agreement, the Company entered into sublease agreements with three companies related by virtue of certain common officers and directors. Pursuant to the sublease agreements, the sublessors will, in aggregate, be committed to pay 75% of base rent and lease operating costs for the duration of the office lease. The following summarizes the Company's base rent commitments for the ensuing five fiscal years:

2004	\$48,600
2005	\$48,600
2006	\$48,600
2007	\$12,200
2008	\$ -

9. Comparative Figures

Certain comparative amounts have been reclassified to conform with the financial statement presentation adopted in the current year.
